

**Introductory statement**

FCA Product Intervention and Product Governance Sourcebook rules (“PROD”) require product manufacturers such as NIG to conduct a product review at least annually to ensure that the product remains consistent with the needs of the identified target market with an appropriate distribution strategy and to communicate the outcome with distributors. Our approach to Product Oversight and Governance Rules can be found [here](#).

This Fair Value Assessment document should be read in conjunction with our Target Market Statement and other materials on [nig.com](http://nig.com) to ensure the product is appropriate.

**Conclusion of our fair value assessment**

<b>Last fair value assessment outcome</b>	The product is providing fair value for target market customers	Yes

## Additional information distributors can provide

When distributors are conducting their own assessments, or in their regular activities, they may become aware of information that may help inform us of potential changes to the product or service to ensure the needs of the target market continue to be met. When this occurs, distributors should contact their usual NIG representative.

## Other information that may assist distributors

If we require additional information on remuneration or on services provided, we will ask for it directly. In conducting our reviews, we have excluded the following aspects that distributors will need to consider when conducting their reviews:

- Fees, charges and other forms of remuneration that are charged to the customer by the distributor, but which are not part of the premium paid to us.
- Any other products sold with this product which could affect the overall value of the customer’s arrangements, e.g., where dual cover is arranged.
- The effect of any third party premium finance arrangements that are made by the distributor on the customer’s behalf.

Distributors should contact their usual NIG representative if there are any questions or observations relating to this product and our assessment of it.
