How is the value of this Product assessed?

- We assess Product Value using quantitative (i.e. metrics) and qualitative information (e.g. processes and controls), including data from our Distributors relating to service and remuneration¹, as appropriate.
- This Product has been approved in line with RSA's Product Governance processes, including consideration of:
 - the value of the RSA Product: this includes: (i) Cover – whether the level of benefits and relevant exclusions offers value to the Customer, (ii) Utility – whether the Product is being used by the Customers of the intended target market, and (iii) RSA Service – whether the type and quality of services being provided is reasonable for the Customer.
 - the impact of distribution on the value: this includes whether Distributor remuneration is appropriate and bears a reasonable relationship to the services provided to the Customer by the Distributor. If there are concerns, RSA will follow up with the relevant Distributors to agree remedial action.

Based on the assessment performed, we have established that this Product is compatible with the objectives, interests and characteristics of Customers of the intended target market and that the distribution strategy is not detrimentally impacting overall Product Value. We have therefore concluded that this Product provides fair value to Customers.

What are the obligations of our Distributors?

- Manufacturer notification – all intermediaries must review their product distribution arrangements at least every 12 months and consider the impact of remuneration against the intended value of their products. Distributors must notify the Manufacturer as soon as practically possible if there are any value concerns for which remedial action is required.
- Remuneration – Distributors must ensure that any remuneration received for an insurance product does not result in the product ceasing to provide fair value to the Customer.
- Provision of information – if so requested, Distributors must provide the Manufacturer with: (i) information on the Distributor's remuneration in connection with distribution of the insurance product; (ii) information on ancillary products or services that may impact the intended value of the Manufacturer's primary insurance product; and (iii) confirmation that the distribution arrangements are consistent with the obligations of the firm under the FCA Handbook including SYSC 10 (Conflicts of Interest) and SYSC 19F.2 (IDD Remuneration).
- Price optimisation – if the Distributor is a price-setting intermediary, unless there is a reasonable basis, firms should not increase the price of the insurance product based on: (i) policies being subject to auto renewal compared to policies that are not subject to auto renewal; (ii) the Customer's vulnerability or any protected characteristics (unless the firm can rely on them under the Equality Act 2010); and (iii) where Customers purchase the policy using Retail Premium Finance.

1. Remuneration includes: commissions, fees, charges, payments, and other economic or non-economic benefits.
